31 1974

The Indology Committee of the Ministry of S. R. & C. A. has recently been taking active interest in the twin tasks of cataloguing of Manuscript-collections in the country and publication of important texts, as a part of and the first step towards its larger programme of a countrywide Manuscripts Survey. The Seminar on Manuscriptology and Textual criticism which the Ministry have now arranged will serve to spot-light this work, which, as the Prime Minister's words reproduced elsewhere in this handbook, would show, is of national importance.

As Correspondent of the Editorial Committee dealing with the Ministry's Scheme for assisting Institutions in the preparation of catalogues of manuscripts and of editions of rare texts, and as one engaged on the work of the New Catalogus Catalogorum, I have, at the instance of the Ministry, prepared this handbook for the benefit of the participants of this Seminar and all those who are engaged in this work of collecting, preserving, cataloguing and editing manuscripts. I must thank Sri T. S. Krishnamurti, Dy. Secretary of the Ministry, for the suggestion that such a publication on this occasion would be proper and useful.

In this brochure, I have given, after a general introduction on manuscripts, complete lists of the Catalogues so far published and other bibliographical publications useful for cataloguing work, and extracts from the reports and papers of the University Grants Commission and the Ministry of S. R. & C. A. relating to the steps taken and schemes formulated for the collection, preservation and utilisation of manuscripts. For including the last mentioned material, I must thank the U. G. C. and Ministry for their permission.

V. R.

INTRODUCTION

I

SANSKRIT AND PRAKRIT MANUSCRIPTS

The manuscripts form as precious a part of our cultural heritage as stone-monuments or other artistic antiquities or historical documents. For understanding the history and culture of the country, the literary treasures enshrined in the manuscripts cannot be ignored. For nearly 4000 years, Sanskrit has been continuously active and perhaps no other language coming from antiquity has put forth such an enormous amount of literature. Only a part of this has come into print, the rest being available only in manuscripts. While oral transmission and memorising were the most ancient form of preservation, the writing down of texts began quite early. The early writer used any material that was available, cloth-silk or cotton-(*paṭa*), plank (*phalaka*), leather and parchment therefrom (*carman*), metal (*tāmrapaṭṭa* etc.), clay-tablets, rock (*śilā*) and bark and leaves of trees (*tvak* and *patra*).¹ Specimens of old documents on all these materials have come down to us. It is not as if edicts, inscriptions and grants alone have come down to us on rock and copper-plate, even literary works-plays (e. g. *Pārijāta-mañjarī*), poems (*Kūrmasataka*, *Hanumadvimśati*), and music and songs (*Kuṇḍumiyāmalai*, *Tāllapākkam* compositions) have come down on stone and copper-plate. But on a large scale, ancient literature has been preserved on leaves, palm (the short and stiff variety which is more common, and the broader and more flexible *śrītāla*) in the South and some other parts of India, Birch in Kashmir, and paper which came to be used in the mainland of India much later, say from about the 10th Century. The paper used was also cut, in many instances, like the palm-leaf and with space for passing the strings being shown. How these old manuscripts in different materials were made, the writing implements, pagination, binding, preservation, paleography, calligraphy, illumination—all these form a fascinating story. Although a palm-leaf manuscript lasts longer and keeps

1. See below *The Story of the Book*

better in the long run than the modern paper-printed book, there has been, down the centuries, regular loss of manuscripts by decay.

The primary place of preservation of manuscripts was the very place of their production namely the houses of scholars, and the schools where they taught and the temples and religious *Maths* where some of them stayed. The destruction of some of these places resulted in the loss of manuscripts. The kings who patronised writers had also Sarasvati-Bhandars or libraries of manuscripts in their palaces. To this day, all these places are known to contain collections, large or small, of Sanskrit manuscripts. In ancient India, the live institutions of scholarly contacts, like debates and visits to courts and places of pilgrimage, led to the migration of manuscripts from one corner of the country to the other. Appayya Dikṣita's works written in Tamilnad are found in Kashmir and the great Kashmirian classics are today preserved in Kerala. This active scholarly commerce comprehended also the countries outside India. During the centuries immediately following Christ, there was the expansion of Indian culture in Cambodia, Siam and Indonesia and Sanskrit works including Dharma Śāstras, Itihāsas and Purāṇas travelled to South-East Asian countries. During the great era of Buddhist expansion, Central Asia, Tibet and China became literary provinces of India. Sanskrit manuscripts were taken by savants to these regions where they were preserved in the original or translated into the local languages. There are thus 1467 Sanskrit works in Chinese and 4446 in Tibetan translations. Not only religious and philosophical works, but even medicine, poetics and drama were taken and translated. There are in these translations numerous Sanskrit classics of which the originals have been lost in India. The Sanskrit manuscripts preserved in Central Asian monasteries have been excavated by European scholars and to-day one has to go to Leningrad, Stockholm and Berlin to study these.

In the last three centuries, the West has been evincing interest in the study of ancient Indian literature. As a result of this, Sanskrit manuscripts flowed towards European and American

Universities, museums and libraries and private collections of antiquities there. In the United States, we have over 5000 Sanskrit manuscripts. In Great Britain alone, we have nearly 30,000 ; on the whole, according to a rough calculation made by the writer during his work abroad on these manuscripts, there are about 50,000 Sanskrit, Prākṛt and Pāli manuscripts in Europe, out of which, for 20,000 for which there is no printed catalogue, he has prepared a survey and inventory. There are Sanskrit manuscripts in Japan also and a Catalogue of 500 of them in Tokyo University has recently been published. Sanskrit manuscript work therefore embraces now the whole world.

In India, of course, it is not possible to make even a rough estimate of the manuscripts lying scattered in every known and unknown place, in public and private custody, in an organised or dis-organised or neglected and decaying condition. With the founding of the modern Indian Universities and institutions for research, in the last hundred and fifty years, a new enlightened interest in manuscripts developed. The editing of Sanskrit texts in a critical manner, comparing different manuscripts of a text, and studying its versions and variations, became a necessary and important part of research. As an indispensable tool for such research, it was necessary to compile a consolidated alphabetical inventory of Sanskrit works and their authors, giving references to all their known manuscripts in the different libraries of the world. Accordingly between 1891 and 1903, the German Sanskritist Theodore Aufrecht compiled the three volumes of his *Catalogus Catalogorum* based on 98 collections and catalogues and extending to 1195 pages of folio size. After the completion of his work, numerous fresh collections had come to be known and many newly formed manuscript libraries had issued catalogues and the Madras University, placed as they were in the South where there was a wealth of manuscript collections, undertook the preparation of a revised and upto-date catalogue. This *New Catalogus Catalogorum* on which the writer has been working has to deal with 400 collections and catalogues as against 98 of Aufrecht, and the volume of information given under each work and author is now seven times that of what Aufrecht gave. Thus

the first volume of the *New Catalogus Catalogorum* dealing with works and authors under the first letter 'A' extends to 380 pages as against the 55 pages of Aufrecht. The whole field of ancient Indian literature-Sanskrit, Prākṛt and Pāli, Hindu, Buddhist and Jain-are covered ; besides references to all known manuscripts of works, editions are mentioned, textual criticism is indicated and references given to the age and other historical particulars of authors. Apart from public libraries and libraries having printed catalogues, special efforts have been made to secure hand-lists from libraries in palaces, Sanskrit Colleges, monasteries, Museums and even several private individuals. This new catalogue will therefore be a kind of manuscript survey of a good part of the Sanskrit manuscripts in India and abroad. There has been recently hardly any editing of a Sanskrit text in India, or even outside, which this *New Catalogus Catalogorum* has not helped by supplying the information on manuscripts. The *New Catalogus Catalogorum* of Sanskrit manuscripts of the Madras University is one of the few major research projects of India, and from the point of view of its basic value to all research, it may be described as the most important of Indian research undertakings.

This work led the writer to gather data on many more collections of Sanskrit manuscripts hitherto unknown. During the recent work of the Sanskrit Commission, he located about 50 such new collections, in distant parts of the country, and on these, he has written in the *Journal of Oriental Research*, Madras, Vol. XXVI. pp. 74-83. Attention is invited also to the chapter on Manuscripts in the Sanskrit Commission's *Report* (1958, ch. VIII, pp. 171-184).

Subsequent to the Commission's work, at the writer's suggestion, the University Grants Commission appointed a Mss. Committee which toured important University Centres and prepared a Report for assisting the collection, preservation and utilisation of Mss. in University departments and institutions. The tour of this U.G.C. Committee revealed still more collections, as also large additions to older ones.

All this would show that there is still the desideratum of making a complete and country-wide survey of Sanskrit manuscri-

pts. As the manuscripts are in such enormous numbers and are scattered in nooks and corners all over the land, only a centrally organised department could do justice to the task of surveying, collecting and cataloguing these manuscripts, preserving them from decay and copying or microfilming them and making them available to scholars or publishing them. Along with organising this central manuscripts department, which the Sanskrit Commission has recommended, arrangements should also be made to have the important Sanskrit classics available in Chinese and Tibetan translations re-rendered into Sanskrit. Similarly Indian scholars should be enabled to work on the Central Asian Sanskrit manuscripts deposited in different European libraries, and edit them.

In the Universities of India, only some of which have so far interested themselves in manuscripts, there is already nearly one lakh of manuscripts, the Travancore University alone possessing a rich collection of about 40,000 Mss. and if we add to this the local Granthappura or Palace collection, recently transferred to the University, this figure would become much more. In the traditional Sanskrit Colleges and Pāṭhasālās of the country, there is more than one lakh, the Banaras Sanskrit College, now the Varanasi Sanskrit University, alone having 90,000, which is the single biggest collection of the country. Taking Research Societies and Institutes, they have among them more than two lakhs of manuscripts. In Libraries and Museums again, there is nearly one lakh. While Hindu Temples and Maṭhs have about a quarter lakh, the Jain monasteries, in Rajasthan and Western India particularly, have an incredibly large number of well preserved and important collections. In Rajasthan there are two lakhs and in Ahmedabad City alone the Jain Mandirs possess 60,000. In the Palace libraries of the former Native State, about a quarter lakh of manuscripts may be found. Private Pandit families still possess the largest number of manuscripts ; in Cochin alone, Pandit families possess 5000 manuscripts and in a place like Banaras, there are even individual family collections going upto this number, and there are also numberless smaller collections. No

study of Sanskrit manuscripts is complete without a survey of Nepal where there is large concentration of manuscripts in public and private possession, some of these being very important; Nepalese manuscripts are as valuable for textual criticism as Kashmir and Malayalam manuscripts, and recently, the Indian Aid Mission in Kathmandu has set up a Committee, of which the writer is a Member, to advise in the cataloguing and publication work of the two big collections in Kathmandu, the older Durbar (now Bir) Library and the National Library consisting of the collection of the late Rajaguru Hemaraj Pandit. We may take note also of Dacca and Lahore, now no longer with us, where two Universities have about 5000 and 6000 Sanskrit manuscripts respectively. There are also the Buddhistic Pāli collections in Burma and Ceylon.

Although the time is now past when manuscripts are likely to go out of India on a large scale, it is still necessary to have some enactments to prevent the transport abroad of literary manuscripts. The public should also be educated about the value of the manuscripts which they possess, and persuaded to deposit them in the nearest library or institution. When the U.G.C. Mss. Committee went round, an interesting suggestion was made to them that *Mātrkāḍān Pada-Yātrās* might be undertaken.

The organising of a department for surveying manuscripts is not a mere matter of safeguarding one class of Indian antiquities. The systematic survey of manuscripts will throw up several outstanding Sanskrit classics of early creative periods of Sanskrit literature in all branches of knowledge, which have gone into oblivion and whose discovery would re-orient and enrich our knowledge of the different systems of ancient Indian thought, branches of literature and criticism, and arts and sciences. One need mention only the example of how the discovery of the manuscript of Kauṭalya's *Arthaśāstra* revolutionised the ideas about ancient Indian culture or of the fragments of Aśvaghoṣa's dramas in Central Asia put back the antiquity of Sanskrit Drama. The slow recovery of the Sanskrit philosophical works from their Chinese and Tibetan renderings enables us to day to understand better the earlier phases of Indian systems of thought like Sāṃkhya,

Vedānta and Nyāya. *The days of discoveries in Sanskrit manuscripts and texts are not yet over.* The patient work of Sanskrit scholars, tracking manuscripts of old, cataloguing them and editing impotent texts from them may not strike the politician and the public as spectacular, but slowly and steadily it is contributing to the proper understanding and adjustment of the ideology of culture for which India has stood, and for which it is hoped she will stand, in and through the exigencies of historical upheavals.

II

THE STORY OF THE BOOK

Many a fascinating story has been written in books. But the story of the book itself, which is not less fascinating, is not well-known. Today, nothing is more common than to think that he who possesses books is a learned man, but for a long time after the development of the power of speech and expression, man communicated and preserved knowledge only personally; voice and ear acted as the prevailing media; this was all the more so in India where knowledge was called in Sanskrit and Tamil, *Śruta* and *Kelvi*, “that which has been heard or listened to”.

When exactly the ancient Indian started reducing his knowledge to visual symbols is largely a matter of conjecture. Historians surmise that the oldest Indian script, the *Brāhmī*, must have been borrowed by ancient Indian traders from Semetic sources in the 9th century B.C., sources to which the European alphabet also goes ultimately, through the Greek. Before the ancient speaker began his experiments in writing in the form of pictographs, ideographs, hieroglyphs and cuneiform, he employed some external aids to memory like knots on ropes, and also signs and gestures. When he wanted to give a visual form for his ideas and sounds, he turned to whatever material he could lay his hands on. With sharp objects he etched on hard surface, or with soft coloured stuff, he drew on hard or smooth surfaces.

The oldest known material on which he recorded is the *Papyrus*, made of the inner bark of the reeds of the Nile banks;

the Egyptian *Book of the Dead* in papyrus-roll goes to the 25th century B.C. The name Bible is traced to a Greek appellation of a roll of papyrus. In the Near East and Middle East, *Clay tablets* have been unearthed which contain political documents and codes of conduct ; a whole library of these tablets have come to light. In Sanskrit and other Indian languages, a book is called *Pusta*, *Pustaka* or *Pustikā*. *Pusta* means modelling, as with clay or metal. When we correlate this with the inscribed clay-tablets, pottery-finds and metal pieces with writings, we may suppose that the book-name *Pustaka* derives from such early predecessors of the book in the form of clay-tablets and metal seals. As papyrus was difficult to preserve, treated skins of animals were then resorted to in the 2nd century B.C. and it is from this dressed skin that the name *Parchment* is derived. The bulk of the Dead Sea Scrolls (300 B.C. – 70 A.D.) are in leather or parchment. Some of the later ms. finds here are also on copper sheets. When the parchment was still holding the field, the West learnt the use of *Pulp of linen* pieces from the East.

The discovery of inscribed *seals*, *pottery* and *metal pieces* among the Indus Valley finds shows not only the knowledge of writing in ancient India but gives also an idea of the materials used for writing in use then. The Veda does presuppose a written form of the Speech or Language. Greek testimony, of Neorchos and Curtis, bears out the use in India in the 4th century B.C. of *Cloth* and the *Inner bark* of trees, i.e., the bark of the Himalayan Birch. In Buddhistic documents which have been unearthed in Khotan and Afghanistan, the leaves of the same tree (Bhurja-Patra) were also used for writing. But the leaf which was most widely used and also the earliest to be used is the palm-leaf.

Kālidāsa refers to the Birch bark as writing material and till recently this was in use in Kashmir. There are many Birch bark manuscripts in libraries. The 11th century Kashmir poet Kshemendra in his satire on the tribe of writers and accountants called *Kāyasthas* describes graphically these writers going about with the materials for writing, scissors to cut leaves, pen, ink-bottle, etc.

The *Palm-leaf* (*Tāla-patra*) in its shorter and thicker variety which is the normal one and in its broader and more pliable variety called *Śrītāla* is by far the most common material in which the bulk of old Indian literature, in Sanskrit and the Prākṛts, have been preserved all over India. That the model of the ancient manuscripts is the palm-leaf is shown by the fragments of manuscripts and the copper plates discovered in Central Asia, the North West Frontier and the Punjab, all of which have been cut to palm-leaf size and provided with round spaces corresponding to its holes for the passing of the thread. The palm-leaf was treated and was inscribed with an iron *stilus* in the South and written over with black ink in the North ; in the former case, the letters were darkened by charcoal powder or leaf-juice, and to make them bright, a white chalk-like powder was spread over in the case of the North Indian ink-written palm-leaves. The oldest palm-leaf manuscript, as found in Nepal, is about 700 years old.

Besides these, *Cloth-cotton* and *silk-* (*paṭa*) was used ; state-documents were written on these. Till very recently, in the Kannada country, the material commonly used and called *Kaḍitam* was made of cotton-pieces stiffened by coatings of a dark paste and written over with chalk (*Kaṭhina*) or steatite pencil. Examples of this could be seen in South Indian manuscript libraries.

Wooden boards (*Phalaka*) and *bamboo* have also been pressed into service. The book-name *Codex* is derived from this wood-material, sawn blocks of which were also used in the West. The word *Book* itself goes to the Beech tree ; beechen boards were used by Anglo-Saxons and Germans.

Despite the keen sense of purity and pollution, ancient India did use to some extent *Leather* in which some documents have been discovered. Strabo refers to the use in India of *Parchment* for State documents.

Like palm-leaf, *Metal plates*, particularly of copper, (*Tāmra-paṭṭa*) were extensively used all through the historical times to record State edicts and grants. Some times the plates were thin, approaching in size a palm-leaf manuscript, but more often they

were heavier oblong sheets. The most remarkable literary records on copper plates are represented by the heaps upon heaps of these preserved in the Tirupati Temple, carrying the entire volume of the musical compositions of the Tāllapākam composers of the Tirupati shrine (A.D. 15th - 16th centuries). There are of course the coins with legends where also metal is used, and the Meharauli Iron Pillar (near Delhi now) which carries an inscription of Chandragupta.

Stone and sides of *rocks* were freely used to record royal exploits and grants, and there is hardly a cave temple or a built temple in India which is not an imperishable library of this type of written material. We have even a couple of dramas preserved in stone inscriptions, the *Harakeli* and the *Lalitavigraharāja* Nāṭakas of the 12th century, and some centuries before this the Pallavas left at Kudumiamalai near Pudukottah, a music treatise on the rock. The earliest and best known rock and stone-column records are the Asokan edicts which have been found in distant parts of the country.

Similar to clay-tablets are the burnt *Bricks* with writings ; excavations relating to the As'vamedha sacrifices performed by certain kings show such inscribed bricks found among the altars and other structures of the sacrificial site.

It is after all these materials had been tried that actual *Paper* came to be handled. Paper was a Chinese discovery (100 A.D.). Paper manuscripts now available within India appear from the 10th century, though in the Kashgar finds, there are paper fragments of an earlier period (5th and 3rd centuries B.C.). Paper manuscripts are rare in South India. North Indian paper manuscripts use an yellow coating as a preservative. The first paper manuscripts again were cut and fashioned like palm-leaves.

One of the names of a book in Sanskrit is *Grantha* ; this would suggest the meaning of something tied together. The palm-leaves were pierced at one end or at two ends, and threads passed through them were used to tie the leaves together. The leaves were provided with protective wooden or occasionally metal

boards, the former sometimes painted over. The ancient papyrus and the document on cloth were rolled over a stick or between two sticks, and it was this rolling that gave the name *Volumen* or *Volume*. It was with the use of parchment, wood, bark and leaf that freer edges and pagination began. The word page is derived from a root meaning 'fastening'. When wood was sawn into two or three blocks and used, some fastening was adopted. Copper-plates had holes to hang them together on a round metal ring with a seal. Just as palm-leaves or paper manuscripts were given planks to protect them, birch-bark manuscripts were given leather covers. Paper manuscripts were also bundled up in pieces of cloth in West India. In the case of the Kanarese *Kaḍitam*, the thick coated cotton pieces of square size were pasted together and folded one upon another, and spread out at the time of reading.

While these were the ways in which the writing material forming a bulk was made into a continuous collection or a book, these materials gave facilities of varying degrees to express the art of writing or the love of the book-maker to produce something beautiful. Religious writings resorted to silver and gold. Islam and Christianity know fine calligraphy and illumination work in manuscripts. In Burma, they covered broad leaves or bark with lacquer and wrote the Buddhist scriptures in gilt letters. While among Sanskrit paper manuscripts we do not know of any noteworthy skill exhibited, except perhaps whole works written in microscopic characters, we have among palm-leaf mss., particularly from Orissa, etchings of figures and coloured paintings; and among South Indian palm-leaves, particularly carrying Tamil religious works, manuscripts cut and designed like *Śiva-liṅga* or the beads of the *Rudrākṣa*-rosary. Pliny speaks of papyrus rolls carrying the whole of *Iliad* and which could be put in a nutshell; such manuscripts are found in India on paper as well as palm-leaf. The palm-leaf, the most ancient material of the Indian book, is also perhaps the longest durable medium.

From the seventh century onwards we have clear evidences of libraries. All over India, there are lakhs upon lakhs of

Sanskrit manuscripts, and there are hundreds of copies of the same works. The nature of the material or the difficulty of writing did not deter the work of making copies or prevent the wide circulation of works. The copying of manuscripts and gifts of copies were considered a meritorious service and scholars anxiously took, during their tours, copies of works produced in one part of the country to the other. There were several indigenous methods of preserving manuscripts, and the crumbling ones were regularly re-copied wholly or were provided with fresh copies for the damaged leaves. Apart from scholars and students who made copies, there were professional copyists, and also professional readers (*Pustaka-Vācakas*).

This story of the book as it was before the age of printing may be closed with the following verse which is found at the end of some Sanskrit manuscripts and which says how a manuscript is to be taken care of by a bibliophile: "It is to be decked like one's beloved child ; to be guarded from another's hand like one's virtuous wife ; to be treated like an injured limb of one's body ; to be looked up every day like a good friend ; to be tied up strongly like a prisoner with strong threads ; and to be always thought of like the Lord's Name ; if one does thus, his manuscript does not come to grief."

**EXTRACTS FROM Dr. V. RAGHAVAN'S
REPORT TO THE MADRAS UNIVERSITY AND
GOVERNMENT OF INDIA ON HIS WORK ON UNCATA-
LOGUED MANUSCRIPT COLLECTIONS IN EUROPE**

12th April, 1954.

***I carved out for my work the compiling of a catalogue of all such collections of Sanskrit and Prakrit Manuscripts in U.K. and Europe for which there were no printed Catalogues. Before I went, only two such collections in Oxford and Cambridge were known, but my search revealed numerous collections of this nature, some very large, both in U.K. and Europe, of which even local scholars, not to mention those outside, had no knowledge. The survey and catalogue of Sanskrit and Prakrit manuscripts I have thus prepared covers, as the table below would show, the whole of Europe, excepting the Iron-curtain countries and Spain and Portugal, and contains about 20,000 manuscripts. The catalogue contains not only lists of Manuscripts, but also in the case of rarer works, notes and extracts.

I. *England.*

London :	School of Oriental & African Studies, British Museum, India Office, Royal Asiatic Society, Luzac & Co., Arthur Probstain and Well- come Medical Histori- cal Research Library	4,959

	Bologna		6
	Venice		7
			<hr/>
		Total	19,052
			<hr/>

The actual number of the works listed exceeds considerably this number 19,025, as, in several cases, the number refers to composite manuscripts or bundles of manuscripts containing works ranging in number from two to twenty, and in some, even fifty and more.

Where some accession lists of manuscripts were available, I have taken microfilm copies of the same.

Also, in the case of a few catalogues printed long ago and not available outside the Library, I have myself taken a hand-copy or arranged for a typed or microfilm copy.

UNIVERSITY GRANTS COMMISSION

MANUSCRIPTS COMMITTEE REPORT

A Summary

1. The visit of the Committee to Universities revealed, in general, a manuscript consciousness in the country and immense possibility for the collection of manuscripts in the different parts of India on a systematic method and under expert guidance. Unless a systematic policy for the collection, preservation and utilisation of manuscripts was pursued in right earnest there is the danger of manuscripts being taken out of the country by allurements held out by foreign agencies as also of destruction because of ignorance and negligence.

2. In some places the existing collection of manuscripts is not being properly preserved and even in places where the manuscripts were cared for with the help of traditional disinfectants etc., it appeared that a scientific treatment of manuscripts was necessary to ensure proper preservation and utilisation. Lack of space in many cases accounted for unsatisfactory condition of storing manuscripts in some Universities. Proper utilisation of manuscripts has been hampered by the absence of catalogues, microfilm apparatus, photostat facilities and want of co-operation among the Universities to utilise even the facilities that are now available. Provision of adequate finances stood in the way of collection, preservation and utilisation of manuscripts in almost all places. With proper supply of finance, better technical and research personnel and equipment can be procured for the collection, preservation and utilisation of manuscripts.

3. Part II of the report contains the recommendations of the Committee which may be summed up as under :—

A. Collection.

- i. A sum of Rs. 5,000/- per annum may normally be made available to the Universities by the University Grants Commission for the purchase of manuscripts. Special grants can be paid for collection of a very

special type after proper examination and assessment by experts.

- ii. To improve the collection of manuscripts a sum of Rs. 5000/- per annum may be placed by the University Grants Commission at the disposal of the Universities towards the emolument of field workers and meeting travelling expenses of teachers and other collectors.
- iii. Each University may set up a manuscript committee to evaluate the collection properly and guard against the purchase of spurious material.

B. Preservation.

The Committee has recommended certain steps for the preservation and maintenance of manuscripts by proper processes of (a) Dusting by a vacuum cleaner, (b) Fumigation, (c) Mending, packing and binding, (d) Storage, etc. These have been specially dealt with in paragraph 15 of the report. For purposes of preservation the Committee has recommended the provision of the technical staff for mending, binding etc. The scale of pay etc. for such staff are mentioned in paragraph 16 of the report.

C. Utilisation.

For better utilisation of manuscripts the Committee has recommended measures under each of the following heads:—

- (a) Sorting and hand-listing.
- (b) Preparation of detailed descriptive catalogues.
- (c) Quinquennial publication of reports and their interchange among universities.
- (d) Searching and referencing work.
- (e) Provision of printed catalogues of other collections, bibliographies, etc.
- (f) Inter-university loan.
- (g) Arrangement for microfilms and photostats.

These have been dealt with in para 16 of the Report.

4. The Committee has recommended the provision of a microfilm reader estimated to cost Rs. 7,000/- to all universities

where such facilities do not exist and the provision of a mobile microfilm unit to the 8 universities listed in para 17 of the report on a regional basis.

5. The Committee has also recommended the provision of photostat equipment and microfilm enlarger at an estimated cost of Rs. 50,000/- to 6 universities as per list in para 18 of the Report.

D. Organisation.

The Committee has recommended that the university libraries may provide sufficient space for the accomodation of manuscripts and rare books inside the main library building. This portion of the library building may be made air conditioned to prevent decay.

5. For proper administration and supervision of manuscripts the following staff may be provided exclusively to deal with manuscripts :—

- i. A curator or keeper of manuscripts in the grade of a university reader.
- ii. Assistant curators or keepers in the scale of lecturers.
- iii. Qualified assistants in the lower grades.
- iv. Experts in oriental learning with special aptitude for manuscript work.

6. The staff requirements for administration and supervision has been dealt with in paragraphs 19-23 of the Report. These may be provided after enquiry about the existing staff in some of the universities. The University Grants Commission may make available to the universities suitable grants for the publication of hand - lists and catalogues of manuscripts as and when they are ready. The Commttee laid stress on the importance of preparing the "Catalogus Catalogorum" of manuscripts in different languages on the lines undertaken by the University of Madras for Sanskrit and Prakrit.

7. The Committee invites the attention of the University Grants Commission to the necessity of suitable legislation to prevent the exit of manuscripts to foreign countries by devious and dubious methods and channels.

8. The Committee requests the University Grants Commission to take suitable steps to help the universities to get an adequate quota of mending materials, e.g., tissue papers, cellulose acetate foil, etc.

9. The financial implication of the recommendations of the Committee, in general, may be summed up as per Statement attached.

A rough estimate of the financial implication of the recommendations of the Manuscripts Committee :—

A. Collection - Exploration and Survey.

	Rs.	
i. Purchase of manuscripts	5,000 (R)	per annum per university.
ii. Salaries of field workers and travelling expenses, etc.	5,000 (R)	„
<i>B. Preservation.</i>		
i. Vacuum cleaner	600 (NR)	„
ii. Thymol Fumigation Chamber or Para di chloro benzine cabinet	600 (NR)	„
iii. Salaries of		
(a) One Technical Assistant at Rs. 160-10-330.	2,400 (R)	„
(b) 2 Menders and 2 Binders	2,400 (R)	„
(c) 3 Peons	2,100 (R)	„

C. Utilisation.

i. 8 mobile microfilm unit at Rs. 20,000	16,000 (NR)	On Regional basis.
ii. Microfilm reader	7000 (NR)	To each University where such facilities do not exist.

- | | | |
|---|--------------|--|
| iii. Photostat equipment, microfilm enlarger and printing apparatus to six universities at Rs. 50,000/- | 30,0000 (NR) | To selected universities only. |
| iv. Salary of Technical Photographer Assistant at Rs. 160-330 | 2400 | per annum to fourteen selected universities. |

D. Organisation.

- | | | |
|---|----------|---------------------------|
| i. Curator or Keeper of manuscripts with research qualifications in the grade of a Reader | 7200 (R) | per annum per university. |
| ii. Assistant Curators or Keepers in the scale of lecturers. One for each language group | 9000 (R) | „ |

TEXT OF THE REPORT OF THE UGC. MS. COMMITTEE

We, the members of the Manuscript Committee appointed by the University Grants Commission to inspect the collection, preservation and utilisation of manuscripts in University Libraries and to recommend measures for improvement, submit the following Report to the Commission :-

Personnel of the Committee.

The Manuscript Committee consisted of the following members :-

1. Dr. V. Raghavan, Professor and Head of the Department of Sanskrit, Madras University,
2. Dr. S. Nurul Hasan, Professor and Head of the Department of History, Aligarh Muslim University,

3. Shri K. D. Bhargava, Director, National Archives of India,
4. Dr. S. Bhattacharya, Education Officer, University Grants Commission.

Meetings of the Committee.

2. The Committee held its first meeting at the office of the University Grants Commission at New Delhi on the 23 November 1959 for a preliminary discussion of the terms of reference and the plan and programme of the work of the Committee. It was decided that before making the final recommendations to the Commission it would be necessary for the Committee to inspect the existing arrangements for the collection, preservation and utilisation of manuscripts in the University Libraries and institutions so that recommendations might be made for necessary improvement and for the better utilisation of the manuscripts for purposes of research. In this connection the Committee considered that in order to have first hand knowledge of the present condition of the manuscripts and the work that is being carried on, on the basis of the manuscript material it would be necessary to visit certain Universities in India.*

5. Besides the Universities and University Institutions the Committee also went on invitation, to certain other Institutions in different places visited by them where there is a systematic arrangement for work based on manuscript material. Among these Institutions mention may particularly be made of the Jaina Bhandaras in Ahmedabad, the B. J. Institute of Learning and Research maintained by the Gujarat Vidya Sabha, Ahmedabad, the Heras Institute of Indian History and Culture, Bombay, the State Library at Hyderabad, the Asiatic Society, Calcutta, Government Sanskrit College, Calcutta, Sanskrit Sahitya Parishad, Bangiya Sahitya Parishad, Calcutta, the Asiatic Society in Bombay and the Manuscript Library of His Highness The Maharaja of Banaras at Varanasi. All these Institutions follow more or less

*They accordingly visited Poona, Baroda, Gujarat, Bombay, Osmania, Visvabharati, Calcutta, Banaras Hindu and Varanaseya Sanskrit and Aligarh Muslim Universities.

the same methods as the Universities for the preservation of manuscripts. The Asiatic Society in Calcutta has got a Fumigation Chamber.

6. Our visits to the Universities as also to the Research Institutions showed that there is, in general, a manuscript consciousness in the country. All the experts whom we consulted in course of our visits were of the opinion that there is immense possibility for the collection of manuscripts in the different parts of India provided a systematic method of collection under expert guidance was adopted and funds were made available to the Universities. We had also reports that owners of manuscripts were sometimes allured to sell them to certain foreign agencies as there was no regular purchase of these in India and as the price offered by the Indian purchasers was considered to be too inadequate. There have been instances of manuscripts being sold in bundles along with other loose papers in weekly markets according to weight at a low price by people who have no idea of the value of their contents. There have also been instances of gifts of manuscripts made by educated and discriminating people to the Universities and learned institutions.

7. In most of the Universities, visited by us, where care is taken of the manuscript material, there is hardly any systematic method for procuring and purchasing the manuscripts. The teachers and research scholars have mostly on their own initiative got the manuscripts from different sources, sometimes with money and sometimes for love. Occasionally sporadic purchases have been made from the owners or dealers of manuscripts sometimes at a nominal price according to weight and sometimes at a very high price. In most of the Universities there are no Committees to advise the authorities about the purchase of manuscripts. All the Universities visited by us as also many of the Universities which responded to the circular letters issued to them in this connection laid stress on the richness of the manuscript material in their respective regions. Most of the teachers and research scholars we met pointed to the necessity of having a systematic policy with regard to the collection of manuscripts, the employ-

ment of the necessary staff of field workers and the provision of funds for the purpose.

8. The manuscripts are kept mainly in the University libraries, though in some Universities only a part of the manuscripts is kept in the Central University Library and other parts are kept in the respective research departments. No University Library we visited has got a fumigation chamber for disinfecting the manuscripts. Some of the Universities have taken advantage of the disinfecting facilities provided by the National Archives of India. The Universities are also prepared to depute some of their Library staff dealing with manuscripts for training in the methods of preservation at the National Archives of India.

9. While most of the Universities are taking good care of the manuscripts according to the resources and facilities at their disposal we regret to have to record that the same amount of care for manuscript material was not visible in a few Institutions. Lack of adequate space accounted for the unsatisfactory condition of storing and keeping of manuscripts in the Varanaseya Sanskrit Vishvavidyalaya, the University of Calcutta, the Aligarh Muslim University, The B. J. Institute of Learning and Research of the University of Gujarat and in the Osmania University. It is expected that with the building up of the new University Libraries with adequate space and provision of Manuscript Sections with necessary air conditioning facilities, the difficulty of keeping manuscripts under proper care and arrangement will be to a large extent removed.

10. As duplication of air conditioning arrangements in the same Library building is not desirable and will unnecessarily add to the maintenance cost it is desirable that rare books and manuscripts which require air conditioning arrangements may be kept in the same section of the University Libraries under proper air conditioning. The Committee feels that the manuscript section should be an integral part of University Libraries and arrangements may be made for the display of important manuscripts in a suitable manner in the libraries.

11. Among the places visited by the Committee, some good work in the utilisation of manuscripts was noticed where hand-lists

have been prepared. But no catalogues of manuscripts, prepared on a systematic line have been published by any of the Universities and the interchange of information among the Universities about the existence of manuscripts in University Libraries and Departments is lacking. The utilisation of manuscripts has also been hampered by the absence of microfilm readers, microfilm apparatus and photostat facilities in most of the Universities.

A set of microfilm apparatus can be effectively used by a group of contiguous Universities conveniently situated and there is absolutely no justification for having different and separate sets of microfilm apparatus in Universities situated in the same city.*** We found that the knowledge about the existence of microfilm apparatus in a particular University was not shared by other Universities.

12. It is hardly necessary today to emphasise the importance of manuscript material for study and research in the history, literature, philosophy, arts, science and culture in India. The great teachers in Ancient India had their own treasures of manuscripts collected and written throughout a life of dedicated study, while the monasteries, the Chaityas and Temples, Chatuspathis and Madrassass, and the palaces of Kings and mansions of the nobility, who were patrons of learning and patriarchs of the society were rich depositories of manuscripts written on birchbark, palmleaf, paper and also on copper and silver plates, cloth, wood and stone. These documents are important not only for the different types and evolution of scripts in which they were written but also for the allied branches of arts like calligraphy and painting. Many manuscripts in earlier centuries travelled beyond the borders of India in the Far and Near East, while the impetus given in the West to the study of Indology in the 19th and 20th centuries has led to the collection and acquisition of manuscripts, whether with money or otherwise, by countries in Europe and America. Even now there are reports, and we were also told in course of our visits to the Universities, that foreign scholars and agencies are collecting manuscripts from the remote interior of India for the scholars in those countries. The conditions in India where there is a lamentable lack of organisation and of provision of finances

for the collection and acquisition of manuscripts in a systematic manner is being fully exploited by outside agencies with the result that invaluable treasures of Indian culture and civilisation are being carried away to the detriment of research work in India. Among the Universities in India, the attempt of the University of Madras for the production of a New Catalogus Catalogorum on the model of the work undertaken by the German scholar Theodor Aufrecht deserves to be specially mentioned in this connection. The experience of persons connected with the New Catalogus Catalogorum in Madras, as also of the Sanskrit Commission who made a tour of the whole of India, has revealed that there are many unexplored regions in India rich in manuscripts and that the new accessions of manuscripts in the learned institutions in India, including the Bhandarkar Oriental Research Institute and other indigenous institutions, require a systematic examination and cataloguing with a view to their proper utilisation. The Universities in India with their highly specialised Staff in the different branches of learning can undoubtedly play an important role in using and editing the manuscripts and in advancing the cause of learning.

13. In course of our tour we saw that some Universities had not yet attached proper importance to the collection of manuscripts, some Universities had not yet examined their collections, some Universities had mere accession lists, while some Universities were preparing detailed catalogues and even made press copies of those ready, but could not print them. Though the lack of adequate finance has undoubtedly stood in the way of the proper use of manuscripts by the Universities, we feel that there should also be a new Orientation in outlook of the scholars and administrators of Universities towards the vast fields of research in the different branches of learning, which is offered by the manuscripts already collected and still scattered all over this ancient country.

14. We therefore make the following recommendations for the collection, preservation and utilisation of manuscripts under each of the relevant heads.

A. Collection-Exploration and Survey.

(i) As we have already reported, all Universities visited by us laid stress on the possibility of further collection of manuscripts in their respective areas. For proper exploration and survey it is necessary that adequate facilities are given to the Universities in the form of staff, etc. We are of the opinion that for a work like this the main lead and inspiration are to come from the teachers connected with research. Where the spirit and atmosphere of research exists the Universities may provide field workers to collect information about manuscripts and to help in the acquisition. For this purpose the Universities which have the necessary possibilities may be provided with two field workers. A sum of Rs. 5,000/- per annum may be placed by the University Grants Commission at the disposal of the Universities towards the emoluments of field workers and meeting travelling expenses of the teachers and other collectors who may have to go round on this account.

(ii) For collections of a special type for which large sums of money are demanded by the owners but which are believed to be of much importance for research and cultural purposes, the Commission may be approached by the Universities for special grants. But all such collections should be inspected and examined and valued by experts before they are actually purchased.

(iii) A sum of Rs. 5,000/- per annum may normally be made available by the University Grants Commission to the Universities for the purchase of manuscripts. The Universities making good use of the provision and doing good work in respect of collection of manuscripts may be helped with further sums if there is sufficient justification. The Universities themselves may also be required to make a provision for the purchase of manuscripts in their normal budget.

(iv) Each University may set up a manuscript committee consisting of experts to evaluate the collection properly and to guard against the purchase of spurious material.

B. Preservation.

We saw that the manuscripts are usually kept tied between card or wooden boards or in bundles of red cloth according to the

traditional methods in India and kept in wooden or steel almirahs. Some protective ingredients like Neem leaves, D.D.T. Powder and naphthalene balls or bricks are also applied in some places for purposes of preservation. Some of the well known institutions, e.g., the Bhandarkar Oriental Research Institute informed us that they are satisfied with the present system of preservation adopted by them. But on closer scrutiny it was found that even in places where manuscripts are usually considered to be well preserved, the material, paper or palmleaf, was being eaten up almost unseen by insects. There is at present hardly any arrangement in Universities for fumigation and lamination, etc. We feel that effective measures should be taken for proper preservation and maintenance of manuscripts and to prevent further damage to them. Many Universities do not even have the necessary furniture and almirahs to keep the manuscripts in order. The danger of keeping manuscripts, in bundles, in heaps on the floor cannot be overemphasised.

15. We recommend that the following steps be taken for the preservation and maintenance of manuscripts after they are received in Universities :-

(i) Dusting by vacuum cleaner. (A vacuum cleaner is usually available for Rs. 600/-).

(ii) Fumigation.

After dusting, all the manuscripts are to be fumigated by placing them in a Thymol Fumigation Chamber or in a para di chloro benzene Cabinet for removal of fungus infection.

The cost of such a Chamber or Cabinet is estimated to be between Rs. 500/- and Rs. 600/-. Universities which have got huge collections of manuscripts, say over 25,000, but have as yet no such facility and are allowing the manuscripts to deteriorate further may have more than one Chamber or Cabinet, in case they are really anxious to proceed with the work of preservation immediately.

(iii) Mending, Packing and Binding : Manuscripts, which are torn or otherwise damaged, require immediate repair. This may be done by hand lamination. Proper flow of material for this, e. g. tissue paper, chiffon and cellulose acetate foil and acetone

should be ensured for the purpose. The use of local gum, glue resin or ordinary Indian paste should be strictly forbidden. The laminated sheet of manuscripts in Sanskrit, Prakrit, etc., should be systematically arranged and carefully packed between 2 wooden boards the size of which should be slightly bigger than that of the laminated sheets so that the manuscript edges may be safe.

In the case of manuscripts written on palm leaves or birch leaves, the repair should be done carefully by the use of chiffon. Paper manuscripts which are in a book form should be properly bound in cloth or leather. Where the manuscript is badly damaged the leaves should be mounted in marginal guards before they are actually bound.

In the case of particularly valuable manuscripts which are badly damaged and require expert mending it is advisable that they are sent to the National Archives of India for proper treatment and rehabilitation.

(iv) Storage.

The manuscripts should be stored in air-tight steel cupboards with an ample supply of naphthalene bricks. The use of D.D.T. Powder should be discontinued as its chemical reactions are not good. Whereever possible, the manuscripts should be kept in air-conditioned rooms. The manuscripts should as far as possible be placed horizontally, i.e. flatly instead of vertically as it is not safe in the long run to rest the weight of a manuscript on one edge only. The manuscripts should be periodically aired within the air-conditioned rooms. They are in no case to be exposed to the sun. To minimise the effect of sunlight it is advisable that in the hot season the windows and ventilators should be covered with thick blinds. Every care should be taken to avoid storing the fumigated manuscripts or manuscripts in good condition along with the infected and non-fumigated ones. The attention of the Universities in this connection is drawn to the instructions contained in the pamphlet on "*The repair and preservation of records*" published by the *National Archives of India* in September, 1959, a copy of which was circulated by the Commission to all Universities.

16. For purposes of preservation the following facilities may be provided in the Universities :—

i. A trained technical assistant to look after the preservation, mending, binding, etc. He may be placed in the pay scale of Rs. 160-10-330. The Universities may, when necessary, get such persons trained in the National Archives of India.

ii. The technical staff for mending and binding : The number of such staff will depend on the number and size of manuscripts in each University. For Universities having 10,000 or more manuscripts 2 menders and 2 binders may be provided. The usual scale of pay for binders and menders in the National Archives of India is as under :—

Binder.....	Rs. 54-2-60-5/2-75.
Menders Grade I.....	Rs. 40-1-50-2-60.
Do. Grade II.....	Rs. 35-1-50.

iii. Peons for dusting and airing manuscripts. Universities having more than 10,000 manuscripts may be provided with three such peons. The University Grants Commission may consider with sympathy the requests of Universities having specially large collections of manuscripts which are in a neglected condition for a special ad hoc grant for preservation and rehabilitation.

C. Utilisation.

The following measures are recommended for the better utilisation of manuscripts :—

i. Sorting and handlisting :—

Immediate steps may be taken by the Universities to examine the manuscripts, sort them, identify them and handlist them. It is essential that the preliminary examination and identification should be done with the utmost care under expert guidance. Manuscripts coming in large codices frequently contain a number of independent works. These should be specially checked and listed. Pending the publication of detailed catalogues, the handlists suggested above should also be published for the use of scholars.

ii. Preparation of detailed descriptive catalogues along approved scientific lines may be undertaken as early as possible. Supplementary lists may be published every five years as and when fresh acquisitions are made. A proforma for preparing detailed catalogues for manuscripts (Sanskrit, Prakrit etc.) is given in Appendix II.*

iii. Publication of a report every five years by each University receiving financial assistance from the University Grants Commission about the progress in the collection, and survey of manuscripts conducted by the University.

The reports may be circulated to other Universities. It may be made clear that publication of critical editions of texts based on manuscripts should be done as a normal part of the research work of a University department and not as a part of the work of the Manuscript Section of the Library.

iv. Searching and referencing work :-

The supply of information based on manuscripts to scholars should be a normal activity of the manuscripts Section and for this trained and qualified personnel may be appointed.

v. Cataloguing :—

To facilitate the work of examination, identification and cataloguing of manuscripts in Universities it is necessary that the Manuscripts Section should have all the printed catalogues of other different collections, bibliographies, etc. During our visit to Universities it was found that the University Libraries were lacking in this important facility. This is sometimes available on exchange basis in India. The attention of the Universities in this connection may be drawn to chapter VIII of the Sanskrit Commission Report entitled "Manuscripts" where the matter has been dealt with in all its details. In case a special grant for this purpose is necessary, the Universities may approach the University Grants Commission for the purpose, giving sufficient justification for their request.

vi. Inter-University Loan :

*This is the same as the one given in the Ministry's Scheme for Cataloguing of mss.

Facilities may be made available for the Inter-University exchange and loan of manuscript material.

vii. Photo-copies of Manuscripts :

To facilitate Inter-University exchange of manuscripts it is necessary that the Universities have arrangements for preparing microfilms and photostats of manuscripts as well as for reading microfilms and reading enlargements. Further, in the case of manuscripts which are likely to decay quickly photo copies or transcripts should be prepared immediately.

17. While microfilms are useful for obtaining copies of manuscripts economically, particularly from abroad and for easy storage, experience proves that for actual research work, specially for collating and editing texts, photostats or enlargement of microfilms are required. We recommend that in view of the work that is now being done in the Universities and in view of the nature of the work that has to be done in this connection the following apparatus may be provided in the Universities.

(a) Mobile microfilming Unit :

This is estimated to cost about Rs. 20,000. This need not be provided in each University but may be distributed on a regional basis. Care should be taken to avoid overlapping and duplication in this matter. No University town need have more than one set of such unit.

While the University Grants Commission may provide a microfilm reader which is estimated to cost Rs. 7,000/- to all Universities where such facilities do not exist, a mobile microfilm unit may be given to the following Universities on the understanding that they will make available to the neighbouring Universities the services of the unit on necessary payment :—Kerala, Osmania, Bombay, Calcutta, Aligarh, Rajasthan (Jaipur), Ahmedabad.

18. Besides the centres mentioned above, the following other Universities may be provided with photostat equipment and microfilm enlarger and printing apparatus together estimated to cost Rs. 50,000 : Madras, Banaras Hindu University, Poona Baroda, Patna, Mysore.

A. Technical Photographic Assistant in the salary grade of Rs. 160-350 may be provided in each of the Universities listed above.

D. Organisation.

19. We are of the opinion that instead of having a separate building for housing the manuscripts, the University Libraries may provide sufficient space for the accomodation of manuscripts and rare books inside the main Library building. This portion of the Library building should be made air-conditioned to keep the manuscripts in good condition and to prevent decay.

For the proper administration and supervision of Manuscripts Sections, a staff exclusively to deal with manuscripts may be provided in the University Libraries. Where the collection exceeds 10,000 manuscripts the staff may be as under :—

- i. A Curator or Keeper of manuscripts with research qualification in the grade of a Reader.
- ii. Assistant Curators or Keepers in the scale of Lecturers, one for each language group of more than 2,500 manuscripts.
- iii. Language groups with less than 2,500 may be looked after by assistants in the lower grade specially qualified in the line. Persons with Oriental learning and qualifications may also be appointed as assistants for the purpose of examining and preparation of reference material, etc., on a suitable remuneration of Rs. 100/- to 200/-.

The staff mentioned above may do the cataloguing and referencing work for the normal collections. The Commission may consider the request of Universities for special provision to catalogue unusually large collections and collections of a specialised nature. The provision of staff for Universities with manuscripts less than 10,000 may be suitably adjusted to the requirements.

20. The Commission may also make available to the Universities suitable grants for the publication of hand-lists and catalogues of manuscripts as and when these are ready.

21. We would bring to the notice of the University Grants Commission the importance of preparing the "Catalogus Catalogorum" of manuscripts in different languages such as the one undertaken for the Sanskrit and Prakrit languages by the University of Madras. We recommend that suitable help may be given to Universities which have already undertaken such works or propose to undertake them in a systematic manner in future.

22. We would draw attention of the Commission to the necessity of suitable legislation to prevent the exit of manuscripts to foreign countries by devious and dubious methods and channels.

23. As difficulty has been experienced in the procurement of mending materials, e.g., tissue paper, cellulose acetate foil, raw film and photo duplicating and printing paper we would request the University Grants Commission to take suitable steps to get an adequate quota of these materials for work in connection with preservation and utilisation of manuscripts.

INDOLOGY COMMITTEE, MINISTRY OF S. R. & C. A.

REPORT OF THE COMMITTEE SET UP TO ADVISE ON THE COLLECTION AND PRESERVATION OF MANUSCRIPTS

In accordance with the recommendations of the Committee of Indology on item 4 of its proceedings held on 25th November, 1960, in New Delhi, the Sub-Committee to consider and report on the collection, preservation and processing of manuscripts in India, met in Madras on 3rd and 4th February, 1961.

2. The following members were present at both the meetings:—

1. Prof. K. A. N. Sastri, Chairman, Indology Committee.
2. Dr. M. Nizamuddin.
3. Dr. V. Raghavan.

4. Sri S. P. Mahna, Asst. Financial Adviser, Ministry of S. R. & C.A.
5. Sri T. S. Krishnamurthi, Dy. Secretary, Ministry of S. R. & C. A.

The Committee had before it the Report submitted to the University Grants Commission by a Committee set up by the Commission to inspect the collection, preservation and utilisation of manuscripts in University libraries and to recommend measures for improvement.

4. The Committee also took note of the recommendations in the matter made in the Report of the Sanskrit Commission.

5. While the Committee noted that the problems referred to in the report of the Committee set up by the University Grants Commission were applicable more or less to all non-University institutions, it felt that the measures to be adopted in regard to the action to be taken to help the non-University institutions in the field would have to be on lines slightly different from those adopted by the University Grants Commission.

6. Various surveys conducted in recent times have shown conclusively that a large number of rare manuscripts were lying scattered all over the country in the possession of various institutions and private individuals and that in most of these cases, due to paucity of funds or ignorance or both, the manuscripts were fast deteriorating and even being destroyed. The Committee also took note of the anxiety expressed some years ago by the President and the Prime Minister of India for early steps to save these valuable treasures for the use of the posterity.

7. Even at present there are many private institutions and individuals engaged on the work of buying manuscripts wherever they may be found, though their activities are necessarily restricted by paucity of funds. In fact, the Committee feels that such institutions and individuals have rendered a signal service to the cause of learning by such work. In the normal course, the best solution to the problem of collecting and preserving the large collections of manuscripts lying scattered all over India, would be to give liberal financial assistance to such organisations and

individuals doing such work. But the committee felt that, however laudable this idea might be, it would not be possible to achieve it in the near future due to the various technicalities, which would necessarily be involved in making public funds available to such bodies and in devising machinery to ensure that the funds so granted are utilised properly for the purposes for which they were given.

8. In the circumstances, the Committee discussed various possibilities and ultimately arrived at the conclusion that the most satisfactory manner of tackling the present problem of collection would be for the Government of India or the proposed Central Institute of Indology to set up one or more Manuscripts Purchase Committees to inspect and purchase manuscripts on the lines on which the Art Purchase Committee is purchasing antiquities for the National Museum. Considering the largeness of the country and the scope of the work to be done, the Committee would even recommend that there might be four Regional Committees functioning in the four different parts of the country for the purpose of collection of such manuscripts.

9. Each of these Regional Manuscripts Committees should have on it the members of the Indology Committee residing in those regions and in addition, the representatives of the more important of the regional learned associations and bodies including Universities which have been engaged in manuscripts work.

10. The Manuscripts purchased by these Regional Manuscripts Purchase Committees would be retained in the regions from within which they were purchased though not necessarily in the same State or may at the discretion of the Indology Committee be located either permanently or on short-term loan with select approved institutions, which have already a large number of manuscripts and are, in the opinion of the Indology Committee, suited and equipped to look after the manuscripts.

11. A word of explanation may be offered in this connection. Four Regional Committees and four Regional centres for keeping these manuscripts have been suggested in view of the consideration that under the Delivery of Books (Public Libraries) Act, the

Government of India have already notified three Public Libraries viz., the National Library, Calcutta, the Connemara Library in Madras and the Central Library, Town Hall, Bombay and propose to declare one more library in New Delhi as the centres to which copies of all books and journals published in India should be supplied free of cost. This Committee expects that in due course these four Public Libraries would have developed and would each have microfilm and photostat equipment, binderies and preservation sections, which would be helpful in looking after the manuscripts and would reduce the cost of preservation of manuscripts. However, the Institute of Indology has not yet come into being; otherwise there would have been Regional Centres at these very four places, where such work could have been attended to. In the opinion of the Committee, therefore the setting up of the Institute is vital to ensure the systematic collection etc. of manuscripts which are lying uncared for in the country.

12. In the meanwhile, this Committee would suggest that the Government of India might with the co-operation of the State Governments set up State Committees for the purchase of manuscripts lying within the State. It may be recalled that some years ago, on the recommendations of the Indian Historical Records Commission, and at the suggestion of the Government of India, almost all the States set up Regional Records Committees, whose function it was to survey and collect records lying scattered within the State for being preserved in the State Records offices. On lines similar to those, State Manuscripts Committee could be set up with financial assistance from the Centre. There might be on it two or three nominees of the State Governments, an equal number of nominees of the Central Government, the members of the Indology Committee resident within the State concerned or near about and representatives of learned bodies and associations (including universities) who have already rendered signal service in the collection of manuscripts. This Committee would function like the Art Purchase Committee referred to earlier and purchase manuscripts wherever and whatever language they may be found. The collections so purchased shall form a part of a national collection which may

be kept at State Manuscripts Library, if there is one, or if there is none, at one of the recognised existing manuscript institutions approved by the State Government on the recommendations of the State Committee.

13. During the initial years, owners of manuscripts may not be willing to come forward and offer manuscripts for purchase by the State Committees. The position would, however, improve with the passage of time and with the building up of confidence even as it did in the case of Art Purchase Committee. Nevertheless as time is an important factor, it would be necessary in the initial period to do a little more to survey and locate manuscripts instead of just setting up a Committee and expecting owners to come forward of their own to sell their manuscripts. With this in view, the Committee would recommend that a lump sum of Rs. 1,000/- per annum might be placed at the disposal of each State Committee to be allotted by it at its discretion, either to the members of the Committee or to other *bona fide* research scholars within the State to enable them undertake intensive surveys in areas which are known to have collections of manuscripts.

14. It should also be possible for the State Purchase Committee to work out a scheme for the grant of a small monetary commission to organisations and individuals who help in locating and purchasing collections of manuscripts.

15. To start with, we would suggest that each State Committee should have at its disposal an annual provision of about Rs. 10,000 per annum by the Central Government, supplemented by at least a 50 per cent addition by each State Government. But in view of the importance of the subject, the Central Government should not defer the initiation of the scheme pending a matching contribution by State Governments, but should start the work with their own contribution even as it was done in the case of the State Record Committees.

Special grants may be made to acquire collections of exceptional size or value.

16. The two alternatives outlined above have been formulated by this Committee not only because of the simplicity of

executing either of them but also because of the absence of complications which would arise in case it is decided to extend financial assistance to a number of organisations within the same State or within the same region for the purchase of manuscripts. A multiplicity of organisations engaged in the purchase of manuscripts would not only defeat the purpose but might also result in owners of manuscripts hawking their manuscripts from one organisation to another in the hope of getting a better price. The Committee also considered the question whether it would be necessary to have any other organisation to purchase these manuscripts in view of the fact that the University Grants Commission has already resolved to aid the Universities in purchasing manuscripts in their areas. The Committee on consideration came to the conclusion that the allotment of a small portion of the work to the Universities would not by itself meet the situation and that the amount of work still required to be done cannot be finished by the Universities alone.

17. The proposal of this Committee that the manuscripts so purchased by the Committees should be housed at the State manuscripts libraries or the four Regional Libraries was prompted by the consideration that such concentration would lead to building up four efficient Centres of preservation etc., without at the same time involving either too much dispersal or concentration of the manuscripts. Such limited centralization would also help in cutting down costs which would be involved if each manuscripts Library in the country were to go in for its own Preservation Section.

18. As regards preservation, the Committee felt that each Regional Centre or each State Centre, as the case may be, should be well equipped not only to deal with the manuscripts acquired by the Regional or State Committees but also to undertake major preservation work for all the smaller institutions situated within that region or State. The smaller individual organisations possessing manuscripts should be persuaded to send their manuscripts for repairs to the Regional or State Centres; the repairs will be made free of cost. The Regional or the State Centre would also make a microfilm copy of the important manuscripts. If the

owning Institution was agreeable to it, the repaired regional manuscripts will be detained in the Regional or State office either as on permanent transfer or as on indefinite or defined period of loan. In return, the owning organisation would be entitled to a free copy of the microfilm of the manuscript.

19. On the lines of the recommendations made by the Committee set up by the University Grants Commission, each Regional or State Manuscripts office should have one or more units of the following staff and equipment, depending on the exact amount of work involved :—

1. *Preservation :*

- | | |
|--|---------------------------|
| (i) Vacuum cleaner | Rs. 600/-(NR) |
| (ii) Thymol Fumigation
Chamber or Para di chloro benzine Cabinet. | 600/-(NR) |
| (iii) Salaries of | |
| (a) One Technical Asstt.
at Rs. 160-10-330. | Rs. 2,400/- per annum (R) |
| (b) 2 Menders and
2 Binders..... | Rs. 2,400/- -do- |
| (c) 3 Peons..... | Rs. 2,100/- -do- (R) |

2. *Processing equipment :*

- | | |
|---|--------------|
| One mobile microfilm Unit. | Rs. 20,000/- |
| One Microfilm Reader. | Rs. 7,000/- |
| Photostat equipment and
microfilm enlarger. | Rs. 50,000/- |
| One Tech. Photographer
Assistant..... | Rs. 2,400/- |
| Room Air-conditioners for
preserving microfilms. | Rs. 2,500/- |

3. Consumable materials and
stocks like Para di chloro
benzine, Acetate, Chiffon etc.

4. *Furniture.*

Almirahs, furniture for readers and research scholars,
Card cabinets etc.

19. With the setting up of the Regional or the State Manuscript Centres, it should not be necessary to extend any financial assistance to the individual organisations holding collections of manuscripts, except for the limited extent for purchasing Vacuum cleaners, Fumigation Chambers and almirahs for the routine care of the manuscripts.

20. In regard, however, to special organisations holding a large number of manuscripts, say, over 10,000, special grants may be made available on merits for the maintenance of preservation sections. To select Institutions for such assistance, a special questionnaire may be sent for the collection of essential data on the basis of which their annual requirements could be assessed.

21. The Sanskrit Commission has stated and this has been reiterated by the Committee set up by the U.G. C. that a number of institutions at present owning manuscripts have not even hand-lists or catalogues of manuscripts in their possession. The Indology Committee have already worked out a scheme for financial assistance to institutions for the publication of catalogues of manuscripts and the scheme has been approved by the Government of India. The scheme provides for 100 per cent assistance for the bringing out of such catalogues. It is a matter of great urgency that all the concerned institutions should bring out such catalogues as early as possible and for this purpose this Committee would suggest that any institution owning manuscripts and expecting grants from the Central Govt. should be informed that the first charge on their resources should be to bring out such catalogues. Secondly, all such institutions should give an undertaking to agree to send their manuscripts for repairs at the Regional or the State Manuscript Centre and for the Centre retaining microfilm copies of such manuscripts and for such microfilm copies being furnished without any other specific permission from the owning institutions to scholars and research institutions either in India or abroad.

22. A number of institutions having manuscripts have either not responded or not co-operated even in making copies available to other institutions or scholars. As the whole purpose of any scheme adopted for the collection and preservation of manuscripts

will be defeated if the manuscripts are not thrown open for studies, this Committee would suggest that each Regional or State Manuscript Centre should prepare at least four copies of each of the important manuscripts and keep one copy at each of the four centres, Calcutta, Madras, Bombay and Delhi.

23. The Regional or the State Manuscript Centre should also arrange to give to scholars and institutions microfilm copies of their enlargements at a reasonable cost.

24. An essential preliminary to the successful implementation of the recommendations contained above would be to assure the availability of the requisite number of suitably trained candidates in the methods of preservation and photography. For this purpose the Government of India may organise through the National archives of India or any other suitably equipped State Archives Department a special course for the training of untrained personnel already employed in manuscripts Libraries. Due to lack of financial resources, and shortage of man-power, most of the organisations concerned may not be willing to depute their employees for such training, as during the period of training they would go without substitutes and also have to pay the deputationists extra allowances for T. A. and increased cost of living at the place of training. In order to obviate these difficulties and to ensure enthusiastic response to the organisation of such courses, the Government of India may give to these organisations a special grant wherever necessary to cover the increased stipends to be given to the deputationists and for the employment of substitutes during the period involved.

25. The Committee also agreed that the catalogues of manuscripts to be brought out by the Institutions with the financial assistance from the Central Govt. under the scheme for the publication of catalogues should be supplemented each year by supplementary lists showing the fresh acquisitions made during the year, the destruction or loss to manuscripts that occur during the year in the past holdings and the corrections of any entries made with the earlier issues of the catalogues.

26. The recommendations of the Committee are as follows:-

(A) *Collection*

(1) The survey and collection of manuscripts should be made by 4 Regional Manuscripts Purchase Committees to be set up by the Govt. of India on behalf of the proposed Institute of Indology. Each of these committees may be furnished with funds of about Rs. 25,000 per annum. In addition, each of these Committees may be given an *ad hoc* grant of Rs. 5,000 per annum to meet the expenditure on the T.A. and D.A. of the members or other select scholars on the work of survey of the manuscripts and for grant of monetary commissions in deserving cases to persons who are of signal help in locating and purchasing manuscripts (paras 8 & 9).

(2) The manuscripts so purchased may be preserved at the four Public Libraries notified by the Government of India under the Delivery of Books (Public Libraries) Act, 1954, to be held by them till the Institute of Indology comes into being; if, however, any of these existing Public Libraries is not fitted to act as repository for such manuscripts even for the interim period, the manuscripts may be housed in an existing institution recognised as suitable for the purpose by the existing Committee of Indology and the Govt. of India on the recommendations of the Regional Manuscripts Purchase Committee (para 10).

(3) Till the Institute of Indology is set up, State Manuscripts Purchase Committees may be set up as suggested above (para 12); each of these Committees being provided with funds of about Rs. 10,000 per annum by the Central Govt. excluding a special provision of Rs. 2,000 per annum for meeting the T. A. and D. A. of members of the Committee or select individuals appointed by the Committee to undertake survey of manuscripts within the State and for giving monetary commissions to private individuals who have rendered signal help to these Committees in locating and purchasing manuscript collections (paras 12 & 15).

(4) The manuscripts so purchased which would form part of the National Collection may be located in the State Manuscripts Centre (Library) if there is one; if not, they may be housed in one or more of the existing organisations in the State which are

approved suitable for the purpose by the State Govt. on the recommendations of the State Manuscripts Purchase Committee (para 17).

(5) The Regional or the State Manuscripts centre may be suitably equipped in personnel and equipment to enable it to care for not only the manuscripts purchased by the Regional or State committee but also undertake the major repairs of manuscripts owned by the smaller institutions within the region or the State (para 18).

(6) Individual institutions situated within the State or the region will not be given financial assistance for the purchase of manuscripts but will be at liberty to purchase from their own funds and to have all their manuscripts repaired free of cost at the Regional or the State Manuscript Centre (paras 17 & 18).

(7) The composition of the Regional Manuscript Purchase Committee will be not more than 10 persons consisting of those nominated by the Central Government, members of the Institute of Indology or Committee of Indology residing within or near the region and representatives of select organisations, who have long been engaged in the work of collecting manuscripts and have experience of such work (para 9).

(8) The composition of the State Manuscript Purchase Committee will be the members nominated by the State and the Central Govt., members of the Committee of Indology residing within the State and representatives of select organisations who have worked for long in the field of collecting manuscripts (para 12).

(B) Preservation :

(1) The Manuscripts purchased by the Regional or the State Manuscripts Purchase Committee may be housed either in the 'Public' Libraries in Calcutta, Madras, Bombay and Delhi or the State Manuscripts Centre, as the case may be, or select organisations which are considered fit enough to look after the manuscripts (paras 11 & 19).

(2) These centres should be suitably equipped to repair and preserve not only the manuscripts located in these centres but also

the manuscripts which might be sent to them for major repairs by the smaller organisations situated within the region or the State (para 18).

(3) Individual organisations may be helped to maintain only the minimum routine equipment like Vacuum cleaners and fumigation Cabinets and almirahs for storing the manuscripts (para 19).

(4) Individual organisations having large collections of manuscripts, say over 10,000, may be helped to maintain adequate preservation units to look after the manuscripts (para 20).

(5) To provide adequate personnel for manning the various Preservation branches at the Centres and the individual institutions, a special training course may be organised by the Government of India at the National Archives of India or a State Archives (Para 24).

6. Candidates deputed by organisations to these courses may be given stipends and T.A. and the institutions sponsoring them may, wherever necessary, be helped financially to enable them to appoint substitutes (para 24).

C. Service.

(1) Regional or the State Centres should be equipped with mobile Microfilm camera, which could be used for taking microfilm copies of not only the important manuscripts located in the Centre but also located in the neighbouring institutions. The priority for microfilming of these manuscripts may be got worked out by an Expert Committee. Institutions which agree to part with the original manuscripts either as a permanent gift or as a loan may be given one microfilm copy, free of cost, with the undertaking that the original would be available to the institution at any time for purposes of reference, four extra copies of the microfilm may be made out and kept at four suitable centres, viz., Calcutta, Madras, Bombay and Delhi (para 19).

(D) Miscellaneous :

(1) All institutions expecting grants from the centre may be informed that the first charge on their resources would be the preparation and publication of catalogues of manuscripts already held,

under the scheme promoted by the Government of India for the publication of such catalogues (para 21).

(2) The Institutions should also undertake to bring out under the same scheme supplements to the catalogue annually setting out additions made, deletions from the earlier lists of manuscripts due to accidents or destructions and corrections of errors noticed in the earlier catalogues (para 25).

(3) All institutions receiving grants from the Central Government should also be asked to agree to make the original manuscripts or microfilm copies thereof available to all *bonafide* research scholars whether in India or abroad; the Regional or State Manuscripts Centre will be at liberty to supply to scholars microfilm copies available with them without reference to the institutions owning the originals (paras 22 & 23).

MINISTRY OF SCIENTIFIC RESEARCH & CULTURAL AFFAIRS

Scheme for Financial Assistance to Libraries and other
Institutions for compiling and publishing catalogues of
manuscripts in their possession.

1. This Scheme applies only to manuscripts in Sanskrit, Pali, Prakrit, Arabic and Persian.
2. All institutions and libraries other than those maintained by or affiliated to Universities are eligible to apply.
3. Only institutions which are maintained by Government or by quasi-Government organisations or which are registered under the Societies Registration Act, 1860 (Act XXI of 1860) shall be eligible to apply.
4. A catalogue should be prepared in the tabular form attached (annexure I) to these rules. No change will be allowed in the form.
5. The entries in the tabular form (Annexure I) should be as per instructions contained in the Explanatory Note appended as Annexure II.

6. The fee for editing the catalogue shall be on the basis of the actual expenditure incurred or at Rs. 2/- (Rs. Two only) per manuscript or codex included in the catalogue whichever is less. This fee shall be inclusive of proof reading.

7. The catalogues should be printed on royal octavo size and the paper used should be of such quality as would last for at least 100 years.

8. The entire expenditure on printing and binding, including the expenditure on paper will be met by the Government of India on production of the printer's bill.

9. Not more than 500 copies of the catalogue shall be brought out. Institutions desirous of bringing out a larger number of copies should take prior approval of the Government of India.

10. The printed catalogue shall be in paper-back unless there are more than 300 pages when they may be stiff-bound.

11. The Institutions receiving a grant under the Scheme shall undertake to furnish, free of cost, not more than 150 copies of the printed catalogue to selected libraries and Indological institutions named by the Government of India for purposes of reference.

12. The Government grant for editing the catalogue referred to in rule 6 above, will be paid in two instalments of about 50 per cent each. The first instalment will be paid in advance. The second instalment will be payable only after the Institution has certified that the first instalment has been utilized.

13. The grant to cover the printing charges will be paid only on receipt of a certificate from the printers that the publication has been printed and is ready for issue.

14. A specimen form showing the various entries to be made in the tabular form in regard to select manuscripts is appended.

TABULAR FORM FOR PREPARING CATALOGUE OF MANUSCRIPTS

Serial No. & subject	Library Accession or collection number if any	Title of work	Name of author	Name of com- menta- tor	Material or sub- stance	Script	Size, number of folios or leaves; lines per page and no. of letters per line	Extent	Condi- tion and age	Additional particulars
-------------------------------	--	---------------------	----------------------	-------------------------------------	----------------------------------	--------	---	--------	------------------------------	---------------------------

1	2	3	4	5	6	7	8	9	10	11
---	---	---	---	---	---	---	---	---	----	----

Explanatory note for filling up the proforma for preparing the Catalogue of Manuscripts.

A. General :

1. No change is to be made in the proforma or in the order of the columns. Column 8 may be sub-divided.

2. Normally manuscripts in different languages should be catalogued in different volumes. However, in the case of smaller collections, manuscripts in different languages may be catalogued in the same volume, but in that case, as there will be different sections for manuscripts of different languages, no separate column for language of the manuscripts is necessary.

For the sake of uniformity, the format of the printed catalogue should be royal octavo.

4. All entries in the tabular form should be in Roman script using the transliteration accepted by the International Congress of Orientalists. The extracts from texts in the Appendix may be in the script/language of the manuscripts concerned ; however, for Sanskrit manuscripts, Devanagari script alone may be used.

5. Each catalogue or volume of a catalogue should have a preface which may explain the details of the scheme of cataloguing as set forth in the tabular statement and instructions furnished. The preface should also give a key to the abbreviations used in the scheme. It should also include a complete alphabetical index of works and authors noticed in the catalogue.

B. Instructions for filling up the form :

Col. 1. (1) Major subject headings* like Veda, Purana, etc. may form section headings. Specification in column 1(1) must be sufficiently detailed to give an indication of the exact content of the volume.

(2) In regard to the more important manuscripts about which further material is to be furnished in an appendix, the letter "E" may be placed in this column immediately after the number.

Col. 3. If the work is already printed and published please indicate it with an asterisk here. Alternate titles given in

*For a full enumeration of these subject headings, see below.

the manuscript should also be shown. If the title in the manuscript is different from that in a printed edition of the work, it may be indicated in column 11.

Col. 6. Please state whether it is on paper, palm-leaf or birch-leaf. The following abbreviations may be used :

Paper-P. Palm-leaf-pl. Birch leaf-B.

Other-Please state the materials-material.

Col. 7. For indicating the script, abbreviations should be used. Please see the attached list of abbreviations (Annexure III). Peculiarities of the script, if any, should be indicated in column 11.

Col. 8. The size of the manuscript should be given in centimetres.

Col. 9. Complete manuscripts may be indicated by the letter "C". Incomplete manuscripts may be indicated by "Inc." followed by the numbers of the extant chapters or divisions. Any other significant particulars in regard to the extent of the manuscripts may be given under column 11.

Col. 10. The following particulars may be entered here :-

(i) Condition of the manuscripts, i.e., "good" or "old" or "recent". If the manuscript is damaged, state nature and extent of damage.

(ii) Enter date of copying, if known.

Col. 11. Here indicate briefly other particulars of special value like the illustrations or illuminations, differences in reading from printed edition, reference to it in other libraries or its being unique, any post-colophonic matter, etc.; if it is a printed work, the particulars of the edition.

Appendix :

Appendix on rare manuscripts which have been indicated by letter "E" under column 1 should include extracts of beginning, ending and colophon, as also any other extract of exceptional significance from the manuscript ; and lists of authors, works, etc., cited.

As said under instructions A. 4, the extracts should be in the script/language of the manuscript. However for Sanskrit manuscripts, Devanagari script should be used.

List of abbreviations to be used for indicating languages in the script of which the manuscripts have been written (vide instructions regarding column 7 of the tabular form contained in the explanatory note in Annexure II.)

	<i>Language</i>	<i>Abbreviations</i>

1. Brāhmaṇa
2. Upaniṣad
3. Prātiśākhya etc.

SĀMAVEDA :

1. Saṁhitā
2. Brāhmaṇa
3. Upaniṣad
4. Lakṣaṇagranthas (e.g. Anupada, Upagrantha, Phulla, Ārṣeyakalpa etc.)

ATHARVAVEDA :

1. Saṁhitā
2. Brāhmaṇa
3. Upaniṣad
4. Prātiśākhya etc. and Miscellaneous works like Atharva Pariśiṣṭa

MISCELLANEOUS VEDIC LITERATURE

VEDĀNGAS :

- S'ikṣā
Nirukta
S'rauta (as per different Vedas and their Schools)

on
lpts

S'rauta Sūtra (including S'ulba) and Prayoga

Gṛhya - " " "

Dharmasūtra

Chandas (Vedic)

Vedāṅgajyotiṣa

SMṚTI :

Mūla-Smṛtis

Nibandhas

(a) Comprehensive works

(b) Treatises on special branches, Āhnikā, Ācāra, Vyavahāra, S'rāddha, Dāna etc.

Purāṇic, Ritual, Vrata, Pūjākālpa, Prayoga, Prāyas'citta, S'ānti etc.

ITIHAṢA AND PURĀṆA

Itihāsa

Rāmāyaṇa (including other Rāmāyaṇas, -Ānanda, Adbhuta and Adhyātma but excluding Yoga Vāsiṣṭha)

Mahābhārata (including Harivaṁśa)

Bhagavadgītā

Minor Gītās, Saṁvādas

Jaiminibhārata (or Jaiminiya As'vamedha)

Purāṇa (a) Mahāpurāṇas (b) Upapurāṇas (c) Other Purāṇic Saṁhitās. Lesser Purāṇic tracts and sections.

PHILOSOPHY

Compendia of all systems like Sarvadaśanasaṅgraha

Nyāya

(In all these systems of philosophy the order should be: Sūtras, Commentaries based thereon, Prakaraṇas and their Commentaries, Vādas)

Navya-nyāya

Vaiśeṣika

Sāṁkhya

Yoga

Pūrva-Mīmāṃsā

Vedānta :

Advaita

Viśiṣṭādvaita

Dvaita
 Śuddhādvaita
 S'aiva
 Kāshmir S'aiva
 Vira-S'aiva
 Other Vedāntic schools : Nimbārka,
 Caitanya
 General Vedāntic and other Philoso-
 phical works : e.g. Yogavāsistha, Para-
 mārthasāra.
 Cārvāka

In Vedānta-schools the order may be Prasthānatraya and commentaries thereon, then Prakaraṇas (Major and Minor) and then Vāda-tracts.

BUDDHISTIC

[Pāli, Sanskrit.

Hīnayāna, Mahāyāna]

1. Canonical, Pāli : i. Vinaya Piṭaka
 ii. Sutta Piṭaka
 iii. Abhidhamma Piṭaka

2. Non-canonical, Pāli.

3. Texts and Remnants of Sanskrit canon

Avadānas, Kathās, Stotras and other miscellaneous reli-
 gious works

Buddhistic Philosophy.

Buddhistic Tantras including Dhāraṇīs

(Buddhistic works on Kāvya, Alaṅkāra and other general subjects will come under those headings in the main subject-classification).

JAIN

(Canonical, Non-canonical. S'vetāmbara, Digambara)

- i. Aṅgas
- ii. Upāṅgas
- iii. Prakīrṇakas

- iv. Sūtras : a. Ccheda
 b. Cūlikā
 c. Mūla with Commentaries

- v. Stotras with commentaries
 vi. Ritual works (Pūjā, Ācāra etc.)
 vii. Miscellaneous religious works
 viii. Philosophy
 ix. Jain Purāṇas
 x. Kathā and Caritra (religious)

(Jain contributions to Kāvya, Nāṭaka, Alāṅkāra, Chandas, Jyotiṣa, Vaidya etc. will come under those headings in the main subject classification)

BHAKTI

Treatises :

Sāstra ; e.g. Sāṅdilya's Sūtras and its commentaries ;
 treatises on Nāma-māhātmya e. g. Bhagavadbhaktira-
 sāyana and so on)

Stotras :

(a) Purāṇic

(b) Nāma - Sahasra

Tris'ati

Aṣṭottara and so on

(c) Philosophical, Tāntric, Mantric and Poetical
 Stotras

All these may be conveniently classified by Deities like
 Śiva, Viṣṇu, Devī and so on and schools like Smārta and
 Advaita, Rāmānuja and Śrīvaiṣṇava, Dvaita, Caitanya
 and so on.

TANTRA

S'āiva

Devī

ĀGAMA

S'āiva

Vaiṣṇava : Pāñcarātra

Vaikhānasa

Sākta

Other: Saura, Gāṇapata etc.

MANTRAS'ĀSTRA - Treatises

Mere Mantras

Mantra-Kalpas

(all these may be classified by deities and particular Siddhis sought for)

KĀVYA

Mahākāvya

Laghukāvya including Satakas and smaller collections

Rūpaka (Drama) Nāṭaka, Prakaraṇa and so on in order of
Das'arūpaka - enumeration.

Campū

Kathā and Ākhyāyikā

Story literature (beginning with Pañcatantra)

Subhāṣita

Nīti Kāvya

Anthologies (S'ārṅgadharapaddhati, Subhāṣitāvali etc.)

Prākṛt and Apabhraṃśa Literature

VYĀKARAṆA

Pāṇiniya : Aṣṭādhyāyī and commentaries

Recasts of the Aṣṭādhyāyī and commentaries
thereon. Supplements to Aṣṭādhyāyī and com-
mentaries thereon. Philosophy of Grammar
(including works on Śabda and Vṛtti)

Kātantra, or Kaumāra or Kālāpa

Cāndra

Jainendra

Śākaṭāyana

Sārasvata

Haima

Jaumara

Vopadeva

Minor grammars

Special treatises on Liṅga, Kāraka, Dhātu, Avyaya and so on

Miscellaneous works

Prākṛt grammar

Pāli grammar

NIGHAṆṬU (KOS'A)

PROSODY

ALAṆKĀRA

NĀṬYA

GITA

S'ILPA

ARTHAS'ĀSTRA

RATNAŚĀSTRA and other miscellaneous useful arts, crafts and technical lore, e.g. Hawking, Chess, Elephant lore, Wrestling, Cooking, Sāmudrika, Indrajāla.

KĀMAŚĀSTRA

ĀYURVEDA (VAIDYAKA)

Complete systems

On special branches

Materia Medica (Nighaṇṭu)

Veterinary Science

Alchemy

Vṛkṣāyurveda

JYOTIṢA

Mathematics

Astronomy (including pañcāṅga)

Horoscopy

Prognostics

Nighaṇṭu

THESAURUS

(like Mānasollāsa, Śivatattvaratnākara,
Prapañcahṛdaya)

**MINISTRY OF SCIENTIFIC RESEARCH
AND CULTURAL AFFAIRS**

Subject :—*Scheme for editing and publication of Rare Manuscripts.*

(1) This scheme applies to manuscripts in Sanskrit, Pali, Prakrit, Arabic & Persian.

(2) All institutions engaged in the editing and publication of rare manuscripts, excepting those affiliated or maintained by Universities are eligible to apply for assistance under this scheme.

(3) Only registered institutions or institutions maintained by Government or semi-Government bodies are eligible to apply under the scheme.

(4) In regard to manuscripts approved by the Government of India for editing and publication, grant will be given at Rs. 5 per printed page of royal octavo size and at 50% of the actual publication cost. The institution concerned will have to find the balance of 50% for printing and publication and only those institutions which are in a position to guarantee adequate funds for this purpose need apply.

(5) The grant for editing will be paid in two instalments of approximately 50% each. The first instalment will be paid in advance and the second instalment on receipt of a certificate from the Institution concerned that the amount of the grant already paid has been utilised.

(6) It will be the responsibility of the Institution receiving the grant to secure from wherever necessary copies of the manuscripts or different recensions of it. The expenditure on obtaining the copies of the manuscripts (handwritten or photostat) will be met by the Govt. of India on production of a certificate from the Institution providing the copies that the rates charged for the copies are the approved rates.

(7) The editing fee of Rs. 5 per page shall be inclusive of the charges for proof reading.

(8) Before starting the work each Institution shall in consultation with the Board of Editors set up by Government settle the lines on which the work is to be carried on. At this time the Board of Editors should be furnished with the name and qualifications of the person who will actually do the editing of the manuscript. The Board of Editors will also intimate to the institutions concerned any information available with them in regard to other similar manuscripts available in other libraries or institutions; but it will be the responsibility of the institution to secure copies of such manuscripts.

(9) a. All texts brought out in this series shall be edited critically using as far as possible all the necessary manuscript material available.

b. A critical edition so edited shall ordinarily consist of :

(i) a text constituted by a critical and comparative study of the available manuscript material and other testimonia bearing on Sanskrit or the other scripts of the original texts and [setting forth the varied lectiones ;

(ii) an introduction containing a statement about the critical apparatus ;

(iii) a discussion (wherever possible and necessary) about the life and times of the author of the work and allied matters ;

(iv) a critical evaluation of the contribution of the text ;
and (v) the necessary appendices and indices.

c. The critical apparatus and introduction shall be in English or Sanskrit or in the language of the work edited, as the case may be, as approved by the Editorial Board.

d. The institution or the editor shall decide, in consultation with the Editorial Board, whether commentaries

on the work (wherever they are available as also translation and notes) are to be included in the edition and if so in what way.

(10) The Board of Editors consists of the following:

(A) *For Sanskrit, Pāli and Prākṛit Manuscripts :*

(i) Dr. R. N. Dandekar, Prof. of Sanskrit, University of Poona, Poona.

(ii) Dr. V. Raghavan, Prof. of Sanskrit, University of Madras, Madras.

(iii) Shri Vishva Bandhu, Director, Vishveshvaranand Vedic Research Institute, Hoshiarpur.

All correspondence with the Board of Editors will, however, be addressed to Dr. V. Raghavan.

(B) *For Arabic and Persian Manuscripts :*

(i) Dr. M. Nizamuddin, Director, Daira-tul-Maarif-il Osmania, Hyderabad.

(ii) Dr. Hadi Hassan, Lalazar, Fort Road, Aligarh.

All correspondence with the Board of Editors will be addressed to Dr. M. Nizamuddin.

(11) Not more than 500 copies shall be published. Where additional copies are proposed to be printed, the prior permission of the Government of India shall be taken.

(12) The institutions shall undertake to furnish, free of cost, not more than 150 copies of the publication to such institutions as may be named by Government. The institution shall also mention in the preface or the foreword or the back of the title page that the publication has been aided by the Government.

—

THE PRIME MINISTER ON MANUSCRIPTS

when he opened recently the Mss. Library of the
L. D. Bhāratiya Samskr̥ti Vidyāmandir, Ahmedabad :

“For the collection and preservation of ancient Sanskrit manuscripts many more such institutions are needed in India. This kind of work should be carried on, on a large scale. Ancient manuscripts are scattered not only in all corners of India, but they are, in originals or translations, found in Gobi desert, Tibet and China. Their proper preservation, research and publication form important work.”
